SKILLS

Front End: Vue, Vuex, TypeScript, JavaScript, jQuery, Razor, Vuetify, React.js, Bootstrap, CSS, HTML

Middle / Back End: C#, .NET, .NET Framework, LINQ, SQL, ASP.NET, ADO.NET, RESTful API

Other Technical: Git, Github, MVC, Visual Studio, VS Code, SSMS, SDKs, Postman, Bash, NPM, Jira, Agile

EXPERIENCE

FiveSixTwo - Software Engineer

March 2022 - March 2023 (Company closed)

- Developed multiple modules using Vue.js, Vuex, .NET Framework / C#, and LINQ, following designer specifications and ensuring efficient database querying.
- Discovery and implementation of Vuex for state management, resulting in a more organized and scalable codebase for a complex application.
- Consistently delivered high-quality code, achieving a 93% acceptance rate on pull requests, high code review marks, and an impressive number of completed story points per sprint.
- Effectively resolved bugs related to jQuery, TypeScript, Vue, Vuex, C#, .NET Framework, and LINQ, enhancing application stability and usability for users and QA.
- Collaborated with design and lead business analysts to develop client-focused solutions, consistently meeting project deadlines and requirements.
- Actively contributed to a high-performing AGILE development team by participating in code reviews, daily stand-ups, and weekly code talks.

Rosehip - Software Developer

October 2021 - February 2022

- Built a React.js reusable file upload component with an Amazon S3 Bucket using AWS SDK API for .NET.
- Implemented PayPal Subscription API which allows users to sign up for different tiered subscription plans.
- Created an administrator dashboard to visualize aggregated data for subscription activity using JavaScript ApexCharts.
- Designed and implemented RESTful API's using .NET 5 to connect to SQL Server using ADO.NET.
- Created tables and stored procedures in SQL utilizing primary keys, foreign keys, joins, look-up tables, composite tables, and date and time functions.
